

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

This is a U.S. Patent Application for:

Title: **DISTRIBUTED VOICE AND WIRELESS INTERFACE MODULES FOR EXPOSING MESSAGING/COLLABORATION DATA TO VOICE AND WIRELESS DEVICES**

Inventor: MAMOUN ABU-SAMAHA
Address: P.O. Box 36022, San Jose, CA 95158
Citizenship: Jordan

APPENDIX

EXPRESS MAIL CERTIFICATE OF MAILING

EXPRESS MAIL NO.: EL055836844US

DATE OF DEPOSIT: October 6, 2000

I hereby certify that I am causing this paper or fee to be deposited with the United State Postal Service "Express Mail Post Office to Addressee" service on the date indicated above and that this paper or fee has been addressed to the Assistant Commissioner for Patents, Washington, D.C. 20231.

Edouard Garcia

(Typed or printed name of person mailing paper or fee)

(Signature of person mailing paper or fee)

October 6, 2000

(Date signed)

APPENDIX

This Appendix contains code listings enabling some of the features of access server 34 exposing the data and functionality of a Microsoft® Exchange server.

Global.ASA

VWA server 152 includes a global.asa file with subroutines used to control when an application starts, when a session begins, when a session ends, when a page is loaded, when a page is discarded, and when an application ends. In one embodiment, the global.asa file is written in Visual Basic® and has the following form:

```
<SCRIPT LANGUAGE="VBScript" RUNAT="Server">
Sub application_onstart
End sub

Sub application_onend
End sub

Sub session_OnStart
'If Request.ServerVariables("LOGON_USER") = "" Then
' Response.Status = "401 access denied"
'End If
End Sub

Sub Session_OnEnd
'on error resume next
Dim myExchangeObj
Dim MyMask
if Not IsEmpty(session) Then
    MyMask=session.SessionID & " *.*"
    set myExchangeObj = CreateObject("VIEWcdo1.WAPproc")
    myExchangeObj.DeleteFiles(MyMask)
    Set myExchangeObj=Nothing
End If

End Sub
</SCRIPT>
```

Default.ASP

The default session features are handled by the following ASP script.

```
<%
```

```

Profile=Trim(Request.QueryString("Profile"))
Password=Trim(Request.QueryString("Password"))
XServer=Trim(Request.QueryString("XServer"))
Mailbox=Trim(Request.QueryString("Mailbox"))
webSID=Trim(Request.QueryString("SID"))
if webSID="" then
webSID=session.SessionID
end if
'Response.Write Profile & " " & XServer & " " & Mailbox
dim XSession
dim Exch
Set ExchObj=CreateObject("VIEWwdo1.WAPproc")
if profile = "" then
profile=ExchObj.Profile
end if
if profile <> "" then
if XServer <> "" and Mailbox <> "" then
XSession=ExchObj.SaveProfile(Profile,XServer,Mailbox,webSID)
end if
if XServer <> "" and Mailbox = "" then
XSession=ExchObj.SaveProfile(Profile,XServer,,webSID)
end if
if XServer = "" and Mailbox <> "" then
XSession=ExchObj.SaveProfile(Profile,,Mailbox,webSID)
end if
XSession= ExchObj.CreateSession (Profile>Password,webSID,"Exchange")
Set ExchObj=Nothing
Response.Redirect (XSession)
End if
Set ExchObj=Nothing
XSession="logon.asp?Profile=" & Profile & "&Password=" & Password
Response.Redirect (XSession)
%>

```

Logon.ASP

The logon features are handled by the following ASP script.

```

<%Response.ContentType="text/vnd.wap.wml"%><?xml version="1.0"?>
<!DOCTYPE wml PUBLIC "-//WAPFORUM//DTD WML 1.1//EN"
"http://www.wapforum.org/DTD/wml_1.1.xml">
<wml>
<template>
  <do type="prev">
    <prev/>
  </do>
</template>

```

```

<card id="card1" title="VIEW Logon">
<p>
Profile:<input value="<%=Request.QueryString("Profile")%>" name="Profile"
title="Profile:"/>
</p>
<p>
Password:<input type="password" value="<%=Request.QueryString("Password")%>"
name="Password" title="Password:"/>
</p>
<p>
<a href="Default.asp?Profile=$(Profile)&#38;Password=$(Password)">Logon</a>
</p>
</card>
</wml>

```

The user profile features are handled by the following ASP scripts.

CDOLoadProfile.ASP

```

<%
Dim myResult
'Create the Collaboration data object
set myExchangeObj = CreateObject("VIEWcdo1.WAPproc")
Profile = Request.QueryString("Profile")
webSID=Trim(Request.QueryString("SID"))
if webSID="" then
webSID=session.SessionID
end if
myResult = myExchangeObj.LoadProfile(Profile,webSID)
set myExchangeObj=nothing
'Response.write (myResult)
'Response.write (strSubject)
'Response.write (strBody)
'Response.write (toRec)
'Response.write (profile)
Response.Redirect (myResult)

%>

```

CDOSaveProfile.ASP

```

<%
Dim myResult
'Create the Collaboration data object
set myExchangeObj = CreateObject("VIEWcdo1.WAPproc")
Profile = Request.QueryString("Profile")
Server = Request.QueryString("Server")

```

```

Mailbox = Request.QueryString("Mailbox")
webSID=Trim(Request.QueryString("SID"))
if webSID="" then
webSID=session.SessionID
end if
myResult = myExchangeObj.SaveProfile(Profile,Server,Mailbox,webSID)
set myExchangeObj=nothing
'Response.write (myResult)
'Response.write (strSubject)
'Response.write (strBody)
'Response.write (toRec)
'Response.write (profile)
Response.Redirect (myResult)

%>

```

USER ACTIONS

User actions are handled by the following ASP scripts.

CDOListActions.ASP

```

<%
Dim myResult
'Create the Collaboration data object
set myExchangeObj = CreateObject("VIEWCDO1.WAPPROC")
Profile = Request.QueryString("Profile")
XServer = Request.QueryString("XServer")
Password = Request.QueryString("Password")
